Jonathan Momperousse

Ruby on Rails Developer

Summary

Ambitious, hard working, **motivated** Ruby on Rails developer. Ready to work in an innovative team with developers and designers to create exceptional web-based solutions. My background in home healthcare has taught me how to be a **teamplayer**, and work through **stressful** situations.

Education

2017-09 - 2018-05

CareerFoundry, Certificate in Full Stack Web Development

Built applications with Ruby on Rails, JavaScript, jQuery, HTML5 and CSS3

- Ecommerce Rails web application, with responsive layout and dynamic tags to be deployed on Heroku and similar environments.
- Dynamic Rails app with visually appealing elements that process data through a database. Implemented features such as signing up and in, product ratings, reviews, and roles for different users
- Production-ready web app to receive card payments and make server requests through AJAX.

2008-07

Long Island University, PharmD

- Completed 64 credits of undergraduate coursework for Doctor of Pharmacy Program.
- Was a member of the university's syndicated college radio station. Besides learning the in and outs of college radio day to day operations; I also traveled with the DJs during shows and helped set up our mobile station. I also guest starred on various shows.

Experience

2017-02 - 2018-04

Home Health Aid

Attentive Care

- Provided care to patients in a home setting.
- Assisted in daily living of clients.
- Logged information about patient on a daily basis.

2011-10 - 2013-12

Rzone Supervisor

Toys R Us

- Supervised associates within the electronics department.
